

# OWETHU PEYANE

## Personal Details

**Age:** 26

**Location:** Johannesburg, Gauteng

**Languages:** English, Xhosa, Tswana

**Driver's License:** No

## Online Presence

- [www.linkedin.com/in/owethu-peyane-34a793281](https://www.linkedin.com/in/owethu-peyane-34a793281)
- <https://github.com/otty98>
- [https://otty98.github.io/owethupeyane\\_portfolio](https://otty98.github.io/owethupeyane_portfolio)

## Technical Proficiencies

- Programming: Java & Python
- Tools: Selenium, Gauge, Git, Docker, GitHub Actions
- Web Development: HTML, CSS, JavaScript, Node.js (Express)
- Databases: MySQL & SQLite
- Testing: Automated Testing, API Testing, Unit/Integration Testing

## Soft Skills

- Problem Solving & Critical Thinking
- Active Listening & Communication
- Time Management
- Adapting fast

## Interests

- Software Testing Automation & AI-driven Testing
- Full Stack Development
- AI and Cloud Computing

# CAPACITI

I am a motivated software developer and QA enthusiast with a strong foundation in Java, Python, software testing, web development, and Agile team collaboration. I am a graduate of Wethinkcode\_ with experience in building full stack and API-driven applications using modern development tools and techniques. Proven ability to learn fast, work in teams, and deliver impactful solutions.

## » Education

**Dansa International College – Matric 2017**

**Wethinkcode\_ - Software Engineering, Graduated in 2024**

- Built a Google Calendar-Integrated Code Clinics System (Python)
- Created a multiplayer network game (Robot Worlds) using Java, sockets & concurrency
- Practiced DevOps (GitHub Actions, Docker), Agile and pair programming
- Developed Distributed Systems

## » Work Experience

**CAPACITI – Digital Associate Software Development Intern**

- Participating in a 12-month hybrid training program covering AI fundamentals and software development.
- Completed an AI bootcamp with projects focused on real-world chatbot prototyping and ethical AI.
- Actively exploring better-suited opportunities aligned with long term career goals.

## » Achievements and Key Projects

- AI Resume Builder (HTML, JavaScript, Node.js and OpenAI live API)
- Sentiment Analyzer (Python, TKinter + TextBlob)
- Chatbot trained on AI related Topics
- SauceDemo Test Automation (Selenium WebDriver + Java, TestNG)
- Flowers Ecommerce Store (HTML, CSS JavaScript, Node.js, Express)
- Hangman Game (Java CLI and HTML, CSS, and JavaScript version)
- Forex Dashboard (Node.js + Express, React)
